PROFESSIONAL SUMMARY

Python Developer and Data Analyst with a B.Tech in Artificial Intelligence & Data Science, building Python-based analytics and machine-learning systems that turn raw data into decision-ready insights. Hands-on with Python, SQL, PostgreSQL and Pandas/NumPy. Built an end-to-end customer analytics platform covering **4,312 customers** and **19,213 orders**, with an XGBoost churn model explained through SHAP, plus AURA, a closed-loop reliability automation agent. Seeking an entry-level Python Developer / Data Analyst role.

TECHNICAL SKILLS

- **Programming:** Python, SQL
- **Databases:** PostgreSQL, MySQL
- **Libraries:** Pandas, NumPy, scikit-learn, XGBoost, SHAP
- **Analytics & BI:** Data cleaning, exploratory data analysis (EDA), KPI analysis, Power BI, Tableau
- **Domain Skills:** Customer analytics, cohort analysis, forecasting, reliability monitoring

PROJECTS

Customer Decision Intelligence Platform

- End-to-end customer analytics over **4,312 customers**, **19,213 orders** and **407,664 line items**: RFM segmentation, churn prediction, customer lifetime value (CLV), cohort analysis and revenue forecasting.
- Built an **XGBoost churn model with SHAP explainability** (**AUC 0.74** on 670 held-out customers) to surface customer-level churn drivers and risk factors; **402 customers** flagged high or critical risk for retention action.
- Delivered Power BI dashboards for customer KPIs, segments, churn risk, revenue trends and business insights, backed by a **live interactive dashboard** (cdi-dashboard.vercel.app).

AURA — Autonomous Unified Reliability Agent

- Built a closed-loop reliability system that automates the incident lifecycle: **observe, detect, diagnose, remediate, verify**.
- Designed a deterministic root-cause analysis engine with runbook-based remediation, telemetry verification and escalation for unresolved failures.
- Created a real-time telemetry dashboard for system resilience testing.

EDUCATION

B.Tech in Artificial Intelligence & Data Science, Kamaraj College of Engineering & Technology. CGPA: **7.72** | Graduated: 2025

CERTIFICATIONS

- Introduction to Model Context Protocol — Anthropic
- Google Analytics Individual Qualification — Google
- Data Fundamentals — IBM
